All Hands On Deck!

Job Specs

Weight: 451 Tons Each

Equipment Used: 24 lines of ESE SPMT's, ramps, mats, load supports & water pumps.

Good things come in twos, just as these decks did. The Berard Team loaded out these four hundred and fifty-one ton decks bound for the Bahamas at two separate locations. One deck was loaded in Houma Louisiana and the other in New Iberia. As part of the same project, the Team also loaded out a five hundred and thirty-five ton jacket which can be seen on the next page. The job was done in a timely manner, keeping the customer's schedule right on track. The Team members did a great job on the project and we commend each and every one of them for a job well done!

Full Metal Jacket

Job Specs

Weight: 535 Tons

Dimensions: 150'L x 55'W

Equipment Used: 24 lines of SLE SPMT's

This 150' x 55', 535 ton jacket was part of the same project as the deck loadouts on the previous page. The jacket was loaded using twenty-four lines of SLE SPMT's, providing maximum maneuverability through the customers yard. The job was completed safely and on time, just the way we like it!

Russell Castille

Head Service Technician

Russell Castille | Head Service Technician

Joining the team in March 2010, Russell has been a welcome addition to the Berard Team as head of our service department. He keeps all the equipment at Berard running in tip top shape.

Russell says what he likes most about working at Berard is the family atmosphere and the company's investment in the best equipment in the industry.

He's also quite musically talented. On weekends Russell takes the stage as lead vocalist and bass player with the band SideShow. (Check them out on Facebook!)

In his off time, Russell enjoys spending time with his wife Joni and daughter Kylie.
