# The Module Loadout

## Job Specs

**Weight:** 415 Tons

**Dimensions:** 60'L x 40'W x  
28'H

**Equipment Used:** 24 axlelines  
of ESE's, 4 ppus, loading  
ramps, high volume water  
pumps and winch trucks for  
barge securement

Another module job for the Berard Team!

This 415 ton, 60' long x 40' wide x 28' high module had to be loaded out for water transport to it's final location by the team using 24 axlelines of ESE self propelled modular transporters and 4 power packs. It was slow and steady as the team rolled the 28' tall module onto the deck barge. Once on the barge and in final position the module was lowered onto a set load supports and sea fastened for water transport. We would like to thank all of our team members for their hard work on this project and as always for working safe!

# Show Report Workboat Show 2013

The Berard Team had a phenomenal showing at the International Workboat Show in New Orleans! The team met with lots of existing clients as well as many new ones from around the globe. One of the things that made us proud was to hear from all the people who commented on how great our company is and how great our people are. This was very well received because that's what we strive for at Berard, to build our company with great people. We would like to give a heartfelt thanks to all who came out and saw us at the show. We look forward to next year and another great show!

## See The Berard Team at Power-Gen 2013

See Us @ Booth # 3948

November 12-14, 2013

Orange County Convention Center Orlando, FL

Sunshine state here we come! The Berard team will be exhibiting once again at the Power-Gen International Show in sunny Orlando Florida November 12-14 at the Orange County Convention Center. The Power-Gen show is the premier show for all things power generation related and it's a great place for Berard to be with all the power related projects we do throughout the year. If you and your company are there be sure to stop in and see us at booth 3948 and say hello. We'll be glad to see you!

# Cookin' Dat Gumbo!

## Berard Team Makes Finals World Championship Gumbo Cookoff

Nothing like the taste of some good gumbo! That was the spirit at the World Championship Gumbo Cookoff in Downtown New Iberia. The Berard's "Team Mega Movers" was a finalist in the event with some great tasting seafood gumbo. The team also cooked up some chicken & sausage gumbo as another entry. Needless to say the competition was fierce and the gumbos were good all around. The Berard Team would like to congratulate all the winners in this years event and we look forward to next year where we'll be bringing more awesome tasting gumbo to the table!

## Loreauville Tailgate Cookoff

The Berard Team also participated in another cookoff event, the Loreauville Tailgate Cookoff benefitting St. Joseph's Church of Loreauville. The team took first place with some venison wrapped in bacon with jalapenos and cream. It was pure deliciousness!

Congrats to the team members who came out and made this event as well as the gumbo cookoff a great success! Thanks to all for the hard work!

# Be Proactive Report Hazards!

To be safe on the job requires a proactive approach and reporting things amiss before they cause an accident. The Berard Team does this on every job, everyday. Our team members are trained to be aware of everything going on around them at all times. Whether on a job site or at our own facility a keen eye helps prevent accidents from happening.

Working around heavy equipment can be very hazardous and that's why we're always looking out for not only ourselves but our fellow teammates because when we look out for one another we all play it safe and get to come home at the end of the day.

Our team members know if they spot something potentially unsafe, they can report it immediately and the problem gets taken care of because that's how we do it at Berard, the safe way, the Berard way!

# Happy Birthday!

**From The Berard Team**

**Berard sends our best Happy Birthday wishes to these dedicated Team Members this month:**
