The 300' Barge Loadout

Job Specs

Weight: 2,400 Tons

Dimensions: 300'L x 100'W

Equipment Used: 52 axlelines of ESE's, 48 axlelines of SLE's, 8 ppus, loading ramps, winch trucks for drydock securement

It was barge moving time once again for the Berard team with the load-out of this 300' long by 100' wide deck barge in Amelia, LA. The move marked a milestone for the client as the first barge built at a new fabrication facility. The team transported the barge from its fabrication position in the yard, executed a ninety degree turn to align with the drydock, and headed straight onto the drydock for launching. The entire move was completed over two days. Once the barge was lowered onto stands on the drydock, the transport equipment was removed, and the barge was launched ready for service.

Offshore Module Loadouts

Job Specs

Weight:

375 & 158 Tons

Dimensions:

71'L x 20'W x 63'H

71'L x 20'W x 29' H

Equipment Used: 24 axle lines of electronically steered transporters, barge ramps, ballast pumps, winch trucks

Headed out to sea? No problem for the Berard team. Berard recently provided load-out and lashing services for 2 large modules, along with over 20 other packages for ocean going transit to an offshore oil platform. Berard utilized 12 axle lines beneath each large package for load-out, which was completed over 2 days at two separate locations. Berard engineers designed full layout and securing plans for the top-heavy cargo for the safe and successful journey to Mexican oilfield waters.

Show Report Topsides 2014

The Berard team once again had a great experience at the Topsides Convention and Exhibition in Galveston, Texas. The Topsides show features suppliers associated with fabrication and implementation of offshore platforms and hulls, and is hosted annually at the Moody Gardens Hotel and Convention center. This year's event attracted over 1,800 attendees, a new record for the young convention. Berard felt right at home among the numerous other suppliers for the industry, rendezvousing with current clients and colleagues, as well as meeting new ones is always enjoyable. We will return next year with a larger booth right at the show's entrance. We hope to see you there!

Katherine Angers

Safety Director

Katherine Angers joined the Berard team in July 2012 as Safety director. With her she brings 15 years of medical experience as an EMT- Paramedic. She also has experience with the Louisiana Organ Procurement agency as a tissue technician, and as a supervisor in the agency's call center. Here she helped donors understand the importance of organ and tissue donation, and the benefits to those in need. "Helping people has always been a passion of mine, and it continues here at Berard." Says Katherine. "I enjoy my interaction with the team, and helping to bring safety awareness first had to our valued employees. I am proud to represent the company to our customers, demonstrating our proactive safety approach. Katherine has been a tremendous asset to the team, and we are proud to have her on board.

In her off time she enjoys four wheeler riding, camping, and spending lots of time with my family and friends.
