# The Compressor Module Project

## Job Specs

### Dimensions:

Pigging Loop Skid:

82' x 26' x 28' 175 tons

Compressor Module:

81' x 26' x 32' 300 tons

### Equipment Used:

12 axle lines of Goldhofer PST-SLEs, 24 axles of Scheuerle SPMTs, 8 barge ramps, winch trucks, ballast pumps & load cells

Berard played an instrumental role in the replacement of a compressor module for a new pigging loop module for a Gulf of Mexico oil platform. Berard first jacked up and weighed the new pigging loop module. This 175 ton module was then transported using 12 axle lines of Goldhofer PST-SLE transporters from the fabrication shop onto a deck barge. Due to shallow water at the roll-on site, Berard derived a roll-on plan using multiple ramp spans to climb onto the 16' deep offshore barge. Once on the barge, the package set sail for the oil platform in the Gulf of Mexico. The old compressor module was removed from the platform and set on the barge, and the pigging loop module was installed in its place. The compressor module returned to the fabrication yard, where Berard used 24 axle lines of Scheuerle SPMTs to transport the cargo from the barge and into storage.

# SC&RA Symposium Report

## Carriers & Rigging Association

Members of the Berard Team traveled to the peach state to attend and present at the 2015 Specialized Carriers & Rigging Association's Annual Symposium held in Atlanta, Georgia. Berard was invited to make a presentation about its SC&RA 2013 'Moving Job of the Year' award. The event was well attended by industry professionals from around the world along with vendors of all sorts of heavy transport equipment and services. A great event with great people and we look forward to next year's event.

## The Dragon Boat Race

It was power to the paddles as the Berard Team participated in the 3rd Annual Dragon Boat Race & Festival. The event was held in New Iberia in Bayou Teche. Teams raced against other teams for a chance to win it all. The Berard Team, nicknamed "The Mega Rowing Experts," won the first race with ease but came up a little short in the second race. We still made a great showing in the event. It was a blast for all involved and we just may be back next year to try again!

## > Team Member Spotlight

# George Broussard

**Amelia Facility Manager  
Business Development**

Joining the team in November of 2013, George Broussard has been bringing not only his vast knowledge of the oil & gas industry, but his incredible fish frying abilities to the team. George heads up our Amelia, Louisiana facility and oversees business development for the region. You can also find him cooking up some of his world renowned fried fish at several of Berard's events.

"I am really proud to be an employee of this company. The history from the start up of what Mr. Roy accomplished, to what Braedon and Brett and their father's have perfected and accomplished today...and still achieving and being awarded for engineering and creativity! I pray that Berard continues to be blessed with prosperity!" says George.

George has 3 children - Chase, Victoria and Gavin. When not working, he enjoys hunting, fishing and riding his Harley.
