Going Up Again!

# The Deck Lift Project

## Job Specs

**Weight:** 772 & 508 Tons

## Dimensions:

102'W x 128'L & 86'W x 102'L

## Equipment Used:

64 lines of SPMTs for jacking, steel beam, crane mats and stands.

Deja Vu? Once again the Berard Team took on another jacking project that was very familiar to the team. In the October issue of OnTheMove, we showcased a double platform jacking and load out project featuring these same two offshore platforms. This time, the team had to lift the decks up 12 feet so the fabricator could add additional legs bringing the decks to a new height for their client. The team began the project by jacking up the two decks using the same method of stacking an SPMT onto another SPMT and using both to lift the deck. The team also utilized steel beams and crane mats to get the height required. Once at the new height, the fabricator welded the additional legs. The team will be back at a later date to load out the decks for water transport to their new installations offshore.

# On The Road The Transformer Transports

## Job Specs

**Weight:** 313,000 Lbs **Qty:** 3

**Dimensions:**  
14'-6" L x 12'-1" W x 16'-8" H

**Equipment Used:**  
8 axle PST-SLE transporter,  
unified jacking system,  
300 ton skid system,  
steel plate.

The Berard team tackled the routine task of setting three transformers in unfavorable conditions recently. These three 313,000 lb. transformers were shipped by rail to a power plant in Arkansas, where the Berard team offloaded them using a jack and slide method. The transformers were then moved within the plant to storage pads. Site conditions around the pads were harsh and constant rain worsened the situation. Steel plate was used along the transport route to support the weight of the transformer and SPMT. In three days, all three transformers were offloaded from railcars, transported, and set onto the pad.

# Berard Receives Business Impact Award

The Berard Team was proud to accept the Greater Iberia Chamber of Commerce Business Impact Award. The team was recognized as one of two local businesses who have made an impact in Iberia Parish and stood out as an exceptional business.

The award ceremony was held at the Chamber's annual awards banquet where a host of businesses and dignitaries were in attendance as well as former LSU Coach Skip Bertman serving as guest speaker. The crowd watched as a presentation video featuring Berard owners and officers played on the big screen, giving them all a glimpse into what Berard is all about.

The Berard Team would like to take the time to thank all of the Greater Iberia Chamber of Commerce members for this prestigious award.

We are grateful.

# Berard adds Scheuerle SPMTs to the Fleet

One of the things that has put us where we are today is our constant investment in the latest advances in heavy transport equipment. Berard is pleased to add Scheuerle self propelled modular transporters to our ever growing fleet. This addition will help us to better serve our clients by providing top of the line equipment as always along with our dedicated team members who strive to bring their very best on every job. We look forward to putting our new trailers to work on your projects!

First load out with the new Scheuerle SPMTs

## > Birthdays @ Berard

# Happy Birthday!

From The Berard Team

Berard sends our best Happy Birthday wishes to these dedicated Team Members this month:

- > Giselle Flores
- > Cruz Stansbury
- > Seth Babineaux
- > Bernie Broussard
- > Justin Thibodeaux
- > Hubert Landry
- > Wilson Lewis
- > Shane Tauzin
- > Lacy Comeaux
- > Morgan Berard
- > Jenny Berard
