On The Road North Dakota Bound!

Job Specs

Weight: 130,000 lbs.

Dimensions:

90'-4"L x 17'-7"H x 13'-6"W

Equipment Used:

Nine axle extendable drop-deck trailer, bucket trucks & escorts

Berard recently transported this electrical building from Houston, TX to Killdeer, ND using a nine axle extendable drop-deck. Berard provided turnkey service to the client for this project by arranging all permits, escorts, and bucket trucks as needed for the 2,146 mile journey. The trip was completed in six days, which was right on schedule.

Power Up! Transformer Installation

Job Specs

Weight: 200,000 lbs. each

Equipment Used:

6 axle SPMT, unified jacking systems, jacks, and 300 ton skid system

Berard was tasked with delivering four 100 ton transformers from rail to pad in Arkansas. Using a 300 ton skid system and 6 axle line SPMT, the team carefully offloaded the transformers from the railcars onto the SPMT. They were then transported to the site and were skidded off of the SPMT and lowered onto each of the pads. All four units were safely installed in only 4 days. Our team did a great job and we thank them for all their hard work and making this project another success story!

On The Road Wide Load!

Job Specs

Weight:
5 @ 50,000 lbs. each

Dimensions:
21'L x 20'W x 16' - 3"H

Equipment Used:
50 ton lowboys, prime movers, bucket trucks, and escorts

When these 20' wide crated skids needed to head out to the port for export, Berard tackled the challenge. Berard performed detailed route surveys from Lafayette, LA to the Port of New Orleans, LA and the Port of Houston, TX to ensure the cargo could be moved. The Port of Houston was selected, and Berard went to work obtaining all permits and permissions. Night movement and wrong-way travel on certain roadways was required to reach the final destination. Berard transported a total of 8 loads of various sizes to complete the project.

> Team Member Spotlight

Anthony Roth

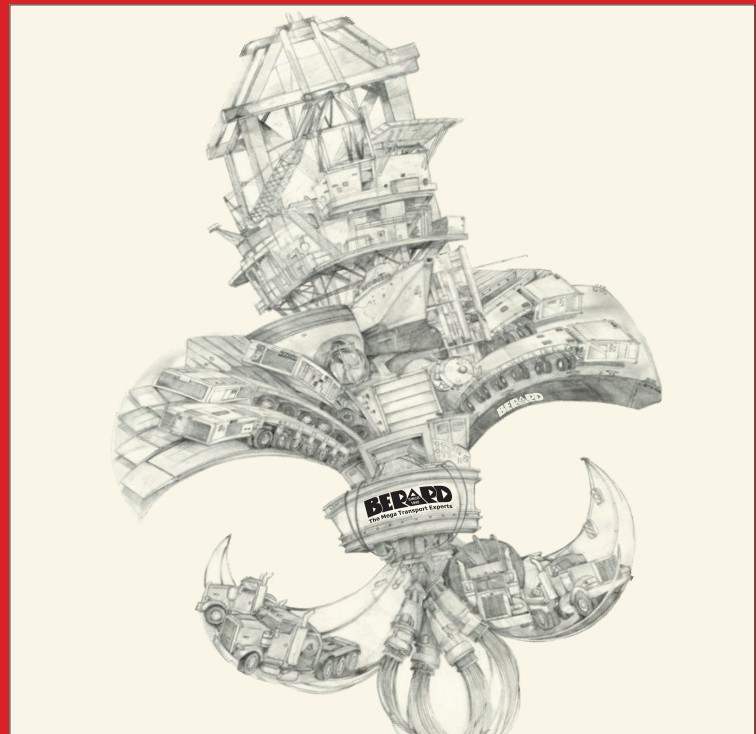

Inventory Control Manager

Joining the team in September of 2013, Anthony has excelled at his duties as Inventory Control Manager. It's a daunting task of keeping track of the thousands of pieces of equipment and inventory that Berard owns. Anthony knows where each piece of equipment is at any given time as he stays on top of his game each and every day.

When asked what he likes about his job, Anthony replied "I enjoy it. I enjoy the complexity of the jobs and what each one offers and takes to accomplish."

When not at work, Anthony enjoys drawing and is a talented artist who can draw just about anything. He even designed this great looking collage on the right for one of our Christmas parties which included a great mix of equipment that we use every day.

> Birthdays @ Berard

Happy Birthday!

From The Berard Team

Berard sends our best Happy Birthday wishes to these dedicated Team Members this month:
