The Fab Yard A Unique Module Load Out

Job Specs

Weights:
374,785 lbs.

Dimensions:
21'-8" L x 38'-5" W x 29'-8" H

Equipment Used:
10 axle lines of SPMTs,
2 power packs, barge ramps,
steel plating & winch trucks

A major EPC company contacted Berard for a solution to transport this unique module from a fabricator to a port for export. The module had 14 legs protruding below the transport surface, rendering a normal transport configuration not feasible. Berard worked with the fabricator to develop a transport mode using a 4 line and 6 line Scheuerle SPMT in a "V" combination, ensured the support points were adequate, and developed a workable load-out plan. When executed, Berard weighed the module, determined COG location, then loaded the module onto a deck barge and secured to Berard engineering specifications. The barge traveled to the Port of New Orleans, LA for direct loading to a vessel for export.

On The Road North Dakota Bound!

Job Specs

Weight:
42,175 lbs. to 89,880 lbs.

Dimensions:
70'L x 20'W x 13'-3"H

Equipment Used:
6 axle Goldhofer extendable and steerable hydraulic trailer, prime mover & weighing system

When a client needed several modules transported to North Dakota, they knew they could rely on Berard to handle it. The team was chosen to transport the modules from the fabricator in New Iberia, Louisiana to Dickinson, North Dakota. The team has transported 20 modules thus far ranging in weight from 42,175 lbs. to 89,880 lbs. with loaded heights up to 15'11" traveling through 8 states with Nebraska requiring night moves. The modules were weighed by the team before several cranes were used to load the cargo onto Berard's Goldhofer 6 axle extendable hydraulic trailer. This specialized trailer allows for maximum maneuverability combined with a low deck height making for a smooth 2,300 journey. The team accomplished the mission on time and incident free.

Tailgate Cookoff Berard Takes The Championship!

The Berard team once again took home the championship trophy in the Loreauville Tailgate Cookoff. The team also won the top award in the wild game division. The event is held annually to benefit St. Joseph's Church in Loreauville. The turnout was another great one for a great cause!

World Championship Gumbo Cookoff!

The World Championship Gumbo Cookoff was a great event attended by thousands in downtown New Iberia, LA. The Berard team has participated in the event for the past 10 years. A great time was had by all the team members and the gumbo was great to boot!

Breakbulk 2019 NextGen Award!

At the recent Breakbulk Americas 2019 conference in Houston, TX, our Vice President of Operations, Brett Berard, was one of a small group of industry professionals presented the “Breakbulk NextGen” recognition. The award nomination process derives from industry peers, a great recognition to Berard's quality service and innovation for the future. Pictured is Stephen Spoljaric, Corporate Manager of Logistics at Bechtel Corporation, who serves on the Industry Panel, and Brett Berard.

Showtime Berard @ PowerGen New Orleans

BOOTH
1800

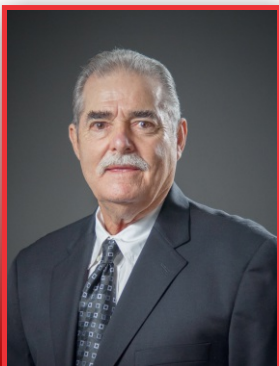

The Berard team will be exhibiting at PowerGen International 2019 on November 19-21 at the Earnest Morial Convention Center in New Orleans. The event showcases all things power related and the Berard team will be there highlighting the many services we provide to the power industry. Come see us at booth 1800 and learn all about our great company!

A Salute To Our Veterans!

"On this Veterans Day, let us remember the service of our veterans, and let us renew our national promise to fulfill our sacred obligations to our veterans and their families who have sacrificed so much so that we can live free."

Hearing Protection Save Your Hearing!

Of all the physical ailments found in factory workers, hearing issues are the most common - so noise protection is a must. Hearing loss affects not just the professional life of a person, but home and social life too.

> Take everyday noise protection care – Wearing high-quality industrial earplugs or ear muffs helps protect your ears and your hearing.

> Avoid loud environments – You don't have to be musician or jackhammer operator to experience hearing loss on the job.

> Use noise protection like ear plugs when needed – If you have hearing loss – or are at risk of it – you should be using noise protection devices like ear plugs at work, on the street and in any other noisy places.

Happy Birthday!

Happy Birthday to These Dedicated Team Members!
