Ship's Ahoy! Launching LCS Savannah

Job Specs

Weight: 2,800 Tons

Dimensions: 418'L x 107'W

Equipment Used: 112 axle lines of SPMTs, 6 power packs, 2 deck spacers, loading ramps, 18 high volume water pumps, 425' x 126' x 25' deck barge, 65 ton winches and tugs

The Berard Team was proud to load out the Navy's newest addition to its fleet, USS Savannah—a 418'L x 107'W Littoral Combat Ship (LCS). Berard accomplished the load out & transfer using 112 axle lines of SPMTs. The team rolled the 2,800 ton LCS from the final assembly bay to a waiting deck barge on time and keeping the project on schedule. The LCS was then barged down river for trans-loading from deck barge to dry dock. The entire process was accomplished safely and in only one day. Congrats go out to our team members and everyone involved for another safely completed project!

Night Moves! Naval Vessel Transport

Job Specs

Weight: 100 Tons

Dimensions:

132'L x 12'W x 28'H

Equipment Used: 20 axle lines of SPMTs, 2 power packs, escort & support vehicles

The Berard team is no stranger to transporting Navy vessels. The team transported an unmanned naval vessel from a client's facility to a neighboring facility for launch. The one mile transport began late in the day to facilitate a night time move as to not disrupt traffic and other daytime activities. Berard worked closely with power, cable and phone companies to handle multiple lines due to the vessel height. Law enforcement was also on hand to help with traffic control. All of this cooperation provided for a smooth transport of the cargo to the final destination. Thanks go out to all involved with making this another successful project for the Berard team.

Storage Profile Theodore-Mobile, AL

- ▶ 2,500 sq.ft. Office
- ▶ 21,000 sq.ft. Shop
- ▶ 10 ton Shop Crane
- ▶ Indoor & Outdoor Storage
