Berard recently loaded out 3 offshore decks in South Louisiana. While deck load outs are a common project for the team, Berard devised a plan to load out all 3 decks in a span of only 2 days. The team loaded out 2 of the decks simultaneously, with the first rolled on acting as ballast for the second in addition to pumping operations. Everything worked as planned and the 2 decks were loaded in under an hour. Also, Andrew Berard, a fourth generation Berard family member was on the job assisting the team and learning the ropes from his father Braedon Berard. The team did a great job making this move in record time for the client.

The Berard team had the honor to once again transport a B1 Bomber for the NAIR B1 digital twin program. The cargo was transported 272 miles from Tinker Air Force base in Oklahoma City, Oklahoma to the NAIR facility in Park City, Kansas in 2 days. The team was greeted by many of the residents of Chandler, OK as the team passed through in parade like fashion. The team was proud to be chosen to transport this amazing part of aviation history. We would like to thank all involved such as our project management and transport team, Oklahoma & Kansas state police, and the many local police officers along the route.
