Mission Complete
P-82 Crane Arrives In Hawaii

Job Specs

Weight:

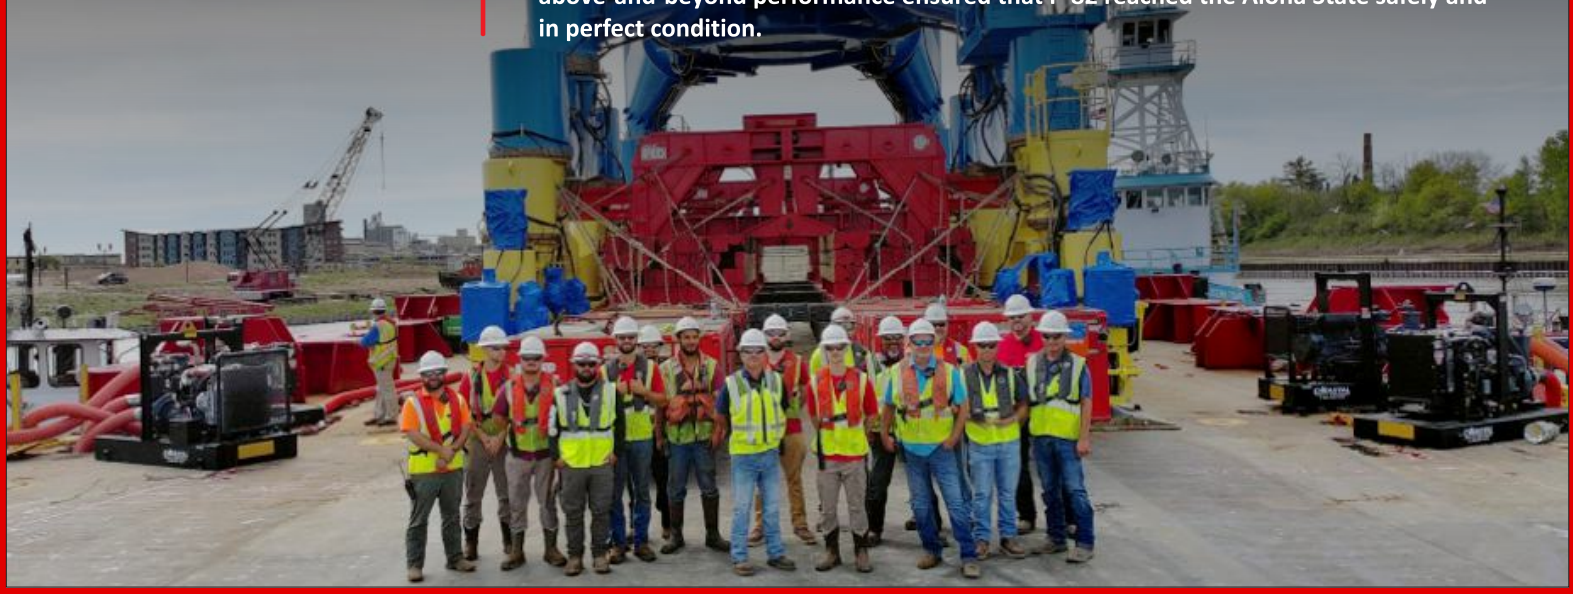

1,000 Tons

Dimensions:
197’L x 45’ W x 155’H

Equipment Used:
40 axle lines of SPMTs, 2 power packs, Berard MBS (Modular Beam System), 260’ x 72’W deck barge, loading ramps, crane mats and barge mounted winches

P-82 has officially arrived in Hawaii, marking the successful completion of another complex heavy transport operation by the Berard team. Originating in Manitowoc, Wisconsin, the 1,000-ton crane was loaded out, secured, and prepared for a long marine voyage engineered entirely by Berard. Our team developed the turnkey load-out and ballast plan, along with the full sea-fastening design and installation required for a 9,000 nautical mile journey that crossed the Great Lakes, the Atlantic Ocean, the Panama Canal, and the Pacific before arriving at a commercial harbor on Oahu Aug. 27 just ahead of Hurricane Lala.

Upon arrival, the crane was offloaded to rail for final positioning. This project also showcased the strength and versatility of our Modular Beam System (MBS), which once again proved to be the right tool for the job. From engineering to execution, Berard delivered a complete end-to-end solution. A huge thank-you goes out to every Berard team member who contributed to this effort. Their expertise, commitment, and above-and-beyond performance ensured that P-82 reached the Aloha State safely and in perfect condition.

The Shipyard
4,741 Ton Behemoth Load Out

Job Specs

Weight:
4,741 Tons

Dimensions:
223’L x 118’ W

Equipment Used:
168 axle lines of SPMTs, 8 power packs, crane mats, barge ramps and winch trucks

Berard successfully transported a massive 4,741-ton wind feeder barge measuring 223 feet long and 118 feet wide, executing the move with the precision these high-stakes projects demand. The team deployed 168 axle lines of SPMTs along with eight power packs to safely lift, stabilize, and maneuver the load through the project site. Coordinating our team as well as the shipyard teams along with equipment of this scale requires expert planning, communication, and control, and Berard once again delivered a smooth, efficient, and safe transport from start to finish. Berard has been helping shipyards stay on schedule with heavy transport solutions for decades. We’re the team to contact for your next shipyard build.

Show Report
Breakbulk Americas

Berard had a great time exhibiting at Breakbulk Americas at the George R. Brown Convention Center in Houston, Texas. Our team truly enjoyed visiting with attendees, reconnecting with longtime clients, and introducing our company to many new faces throughout the event. Breakbulk continues to be an outstanding opportunity to share our capabilities, strengthen industry relationships, and showcase the heavy-lift and transport solutions Berard is known for.
